

**Vaillant ecoTEC plus 637HE**  
**37Kwh**

5 year Manufacturers Guarantee

System Boiler type for use with  
Unvented Systems

Gas Safe Registered Installers

Supply and installation cost:\*

**£2800 + VAT**

### **Magnet Cleaner**

Over time, rust will build within the heating systems and radiators which will steadily reduce the boilers efficiency over time. We recommend that every new boiler installation should also be equipped with a magnet cleaner which will collect the rust and metal particles before they reach the boiler system. We can install magnet cleaner on new or existing systems for **£185.00 + VAT**

### **Power Flushing**

Any boiler system over 3 years old will have begun to build up rust and metal deposits within the heating and boiler pipework which will be reducing the heating efficiency by 30%. To ensure the longevity and reliability of your boiler you should have it power flushed every 3-4 years. Power flushing radiators starts at **£350 + VAT**

\*Boiler installation cost shown are based on the specified boiler connected to an existing unvented system within a 3-5 bedroom property.
